

*You Can
Make It
Happen...*

**If each NDSC member donates just \$1,000 or more,
we can put a shovel in the ground this fall!**

- Your donation may be **tax deductible** if your organization qualifies under IRS guidelines. The NDSC is a private 501(c)(3) non-profit organization.
- Your business will be **recognized** on the sponsor wall in the Safety Campus lobby.
- You'll **save lives** by contributing to better safety training across all of North Dakota.

To contribute, complete the enclosed contract and mail a check, or visit www.ndsc.org/membership to fill out the online form and pay by credit card.

The North Dakota Safety Council is a private non-profit organization supported through grants, donations, memberships and training. Our mission is to save lives by preventing injuries and deaths at work, on the roads, and in our homes and communities.

**One Life Lost Is
One Too Many.**

Thirty-eight North Dakota workers died on the job in 2014 and countless more were injured.

In a tight-knit state like ours, every report of an injury or death is a tragedy that hits home.

Because North Dakota's economy is built on some of the nation's most dangerous industries, **safety needs to be our number one priority.**

You can help us do just that.

One Life Lost Is One Too Many.

We need your help building a hands-on safety training campus to make North Dakota safer and save more lives.

Proposed Safety Training Campus

Your donation will:

- Provide access to the most effective types of training: interactive and hands-on.
- Allow students to understand hazards in a risk-free environment with access to heavy equipment and vehicle simulators.
- Improve access to safety training across the region with a centrally located campus, high-tech classrooms for distance learning and more space for increased capacity.
- Improve diversity of training available in North Dakota by adding relevant training in all areas of workforce and public safety.

Simulators will train students on safe driving techniques and heavy equipment. Confined space rescue, fall protection, scaffold techniques and more, are planned in the hands-on lab.

With your help we can put a shovel in the ground this fall and be on our way to

Saving More Lives
