

ADVANCED SAFETY CERTIFICATE

Developing Exceptional Safety Practitioners

The NSC's Advanced Safety Certificate Program is a nationally accredited safety curriculum based on proven best practices. This dynamic program is aimed at developing high potential employees into Safety Practitioners that can contribute to creating a culture of safety.

The robust curriculum goes beyond training to ensure participants can:

- ★ Quickly identify hazards and implement corrective actions
- ★ Develop and execute effective safety plans
- ★ Think critically about safety
- ★ Solve occupational safety workplace problems

How to Earn the Advanced Safety Certificate:

STEP 1 (required):

Complete the core required course, Principles of Occupational Safety & Health (4 days/2.6 CEUs).

STEP 2:

Customize your curriculum by selecting any combination of 4- and 1-day courses to earn your remaining 5.2 CEUs.

Four Day Courses (2.6 CEUs)

Members: \$1,295, Non-Members: \$1,650 (unless otherwise noted)

- Safety Management Techniques
- Fundamentals of Industrial Hygiene
Members: \$1,395, Non-Members: \$1,750
- Safety Training Methods

One Day Courses (0.65 CEUs)

Members: \$325, Non-Members: \$425

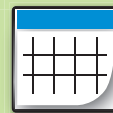

- Ergonomics: Managing for Results
- Incident Investigation: Root Cause Analysis
- Job Safety Analysis
- Team Safety
- Safety Inspections

ASC program CEUs are accepted by BCSP, AIHA and other professional certification programs.
