

# ADVANCED SAFETY CERTIFICATE

## Developing Exceptional Safety Practitioners

The NSC's Advanced Safety Certificate Program is a nationally accredited safety curriculum based on proven best practices. This dynamic program is aimed at developing high potential employees into Safety Practitioners that can contribute to creating a culture of safety.

*The robust curriculum goes beyond training to ensure participants can:*

- Quickly identify hazards and implement corrective actions
- Develop and execute effective safety plans
- Think critically about safety
- Solve occupational safety workplace problems

## How to Earn the Advanced Safety Certificate:

- STEP 1** (required)  
Complete the core required course, Principles of Occupational Safety & Health (4 days/2.6 CEUs).
- STEP 2**  
Select and complete any combination of the other courses to earn the remaining 8 training days and 5.2 CEUs required, for a total of 12 days and 7.8 CEUs. All course requirements must be completed in a five-year period.

### One Day Courses

(0.65 CEUs)
